

DEIPP clinics are designed for families with children newborn to 5 years of age who live in the Halton Community. The purpose of DEIPP is to provide a quick **15 minute** consultation for parents who are questioning whether or not to be concerned about their child's development. If it is evident to a parent or professional that there are existing developmental concerns then **DEIPP** clinics are **not** appropriate. Instead, a referral for a full assessment should be made directly to the appropriate services eg. speech, hearing, developmental organizations. **DEIPP** offers consultations with professionals from community agencies in the following areas:

* **Speech – birth to 5 years**

A Speech Language Pathologist will briefly screen your child in the area of speech and language.

* **Hearing – 1 to 5 years**

An Audiologist will provide a brief check of your child's hearing. For infant hearing call ErinoakKids.

* **Behaviour – birth to 5 years**

A Preschool Consultant will briefly discuss your questions and concerns regarding your child's behaviour. (For example: toilet training, temper tantrums, anxiousness, etc.)

* **Preschool – 2 to 5 years (not attending JK/SK)**

A Resource Consultant will provide a quick check looking at all areas of learning and development. For example: pre-writing skills, coordination, problem solving skills, etc.

* **Infant – birth to 2 years**

A Developmental Consultant will provide a quick check looking at all areas of development. For example: eye-hand coordination, walking, alertness to their environment and reaction to toys.

A Public Health Nurse will also be available at clinics to provide information on nutrition, safety, immunization, parenting, etc.

The Dream

*A Goal Which Is Realistic
For Our Child*

*We all know that dreams are attained
not through wish fairies, but through
what we do to help our children take
those small steps to reach their
potential.*

Ayela Manolson
